

Symantec™ Hosted Mail Security

Hosted email security solution powered by industry-leading antispam and antivirus technologies

Symantec Hosted Mail Security Architecture

Overview

Symantec™ Hosted Mail Security protects email infrastructures from spam, viruses, and other unwanted content. Hosted by Symantec, the solution features award-winning Brightmail AntiSpam and Symantec AntiVirus technologies. In addition to a 95%* antispam effectiveness rate, Symantec Brightmail AntiSpam boasts the industry's best accuracy rate (99.9999%) against false positives.** As a hosted offering, the solution reduces the IT burden associated with managing on-premise solutions, requiring no on-site hardware, software, or ongoing administration. Secure browser-based access allows administrators to set and enforce email security policies, while content compliance features make it easy for organizations to control sensitive email content and enforce content rules to conform to IT, HR or regulatory requirements.

Features and Benefits

Hosted email security solution powered by industry-leading Symantec Brightmail AntiSpam and Symantec AntiVirus technologies for effective spam and virus protection

- Hosted solution reduces the IT burden associated with managing on-premise solutions and allows companies to deploy their resources more effectively
- Decreases IT expenditures for additional hardware, bandwidth, and storage required for gateway email security
- High accuracy allows customers to safely delete spam without review, eliminating the need to double-check quarantines for false positives

Data Sheet: Virus Protection, Antispam and Content Filtering Symantec™ Hosted Mail Security

- Provides secure browser-based access for setting and enforcing email security policies
- Administrator and end-user quarantine that includes both Web-based and automated email digest options allows end users to manage their quarantined email and frees IT managers from having to address individual quarantine issues
- Preserves email infrastructure by allowing only filtered email—free of spam and viruses—to reach corporate email servers
- Content filtering features include attachment blocking, subject and message body filtering and encrypted file handling
- Content compliance features make it easy for organizations to control sensitive email content and enforce content rules to conform to IT, HR or regulatory requirements
- Pre-defined reports allow administrators to gain insight into trends and event statistics

System requirements

Management of the service is via a secure Web connection using one of the following browsers:

- Microsoft Internet Explorer 6.0
- Netscape 7.1
