

Symantec™ Endpoint Protection Small Business Edition

Trusted protection from malware and email-borne threats

Overview

Symantec™ Endpoint Protection Small Business Edition is a simple, easy-to-use, and cost-effective solution designed to safeguard business assets with advanced threat protection and email security.

Endpoint protection

Symantec Endpoint Protection delivers more than world-class, industry-leading antivirus and antispymware signature-based protection. It also provides advanced threat prevention that protects endpoints from targeted attacks and attacks not seen before. It includes turnkey, proactive technologies that automatically analyze application behaviors and network communications to detect and block suspicious activities, as well as administrative control features that allow you to deny specific device and application activities deemed as high risk for your organization—you can even block specific actions based on the location of the user. This multilayered approach significantly lowers risks and gives you the confidence that your confidential information and business assets are protected. Whether the attack is coming from a malicious insider or is externally motivated, endpoints will be protected.

Mail protection

Symantec™ Mail Security provides high-performance mail protection against virus threats and security risks for Microsoft® Exchange servers. With the purchase of a license key, Symantec Premium AntiSpam™ can be integrated to provide accurate spam detection without additional administration, installation, or hardware.

Symantec also offers a range of consulting, technical education, and support services to guide you through the migration, deployment, and management of Symantec Endpoint Protection Small Business Edition and help you realize the full value of your investment. Essential Support Services provide confidence that your critical assets are supported around the clock, and for customers requiring onsite design and implementation services, Symantec™ Consulting Services has several offerings available.

Key benefits

Secure

Multilayered defense—Includes the integrated Symantec Endpoint Protection solution for Microsoft Windows® operating systems, in addition to the award-winning Symantec Mail Security for Microsoft Exchange. This combination provides heightened protection against the evolving threat landscape, and it protects against email-borne virus threats and security risks in a turnkey package.

Comprehensive protection—Integrates best-of-breed technologies to stop security threats—even from the most devious new and unknown attackers—before they penetrate the network. Detects and blocks malicious software in real time, including viruses, worms, Trojan horses, spyware, adware, and rootkits.

Proactive protection—New Proactive Threat Scan uses a unique Symantec technology to score both good and bad behaviors of unknown applications, enhancing detection and reducing false positives without the need to create rules-based configurations.

Industry-best threat landscape intelligence—Symantec protection mechanisms use the industry-leading Symantec™ Global Intelligence Network to deliver an unparalleled view of the entire Internet threat landscape. This intelligence results in actionable protection and peace of mind against evolving attacks.

Simple

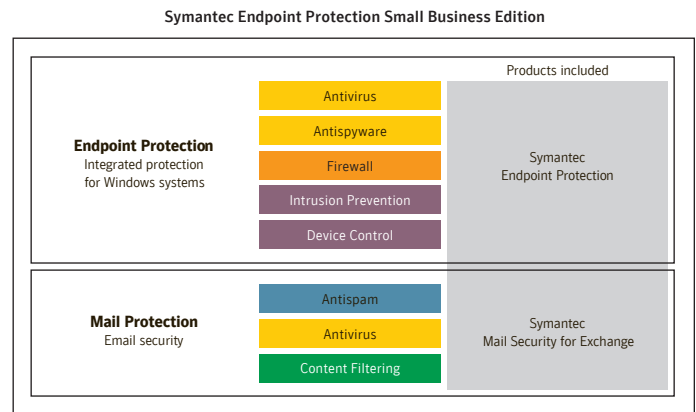

Easy to install, configure, and manage—Symantec Endpoint Protection makes it easy to enable, disable, and configure desired technologies to fit into your environment.

Seamless

Symantec™ Network Access Control ready—Each endpoint becomes “Symantec Network Access Control ready,” eliminating the need to deploy additional network access control endpoint agent software.

Integration with Altiris endpoint management

solutions—Makes it easier to distribute software packages, migrate older Symantec AntiVirus™ or other antivirus deployments, and view new agent rollout status and activity.

* Symantec Premium AntiSpam available as an optional add-on module

Key features

More than antivirus

Antivirus and antispyware—Symantec Endpoint Protection provides best-of-breed malware protection, including market-leading antivirus protection, enhanced spyware protection, new rootkit protection, reduced memory footprint, and new dynamic performance adjustments to keep users productive.

Network threat protection—Offers a rules-based firewall engine and Generic Exploit Blocking (GEB) to block malware before it can enter a system.

Proactive threat protection—Provides protection against unseen threats (i.e., zero-day threats). Includes Proactive Threat Scan, which does not rely on signatures.

Single agent and single management console—The Symantec Endpoint Protection portion of Symantec Endpoint Protection Small Business Edition provides antivirus, antispyware, desktop firewall, IPS, device control, and network access control (with the purchase of a Symantec Network Access Control license) on a single agent—all managed by a single management console.

Email protection—Provides protection against email-borne virus threats and security risks in a turnkey package.

Minimum system requirements

Endpoint protection

Symantec Endpoint Protection Client

Protection software for server, desktop, and laptop systems

Component	32-bit	64-bit
Microsoft® Windows® Vista®	X	X
Microsoft Windows® 2003	X	X
Microsoft Windows® XP	X	X
Microsoft Windows 2000 (SP3 and later)	X	
Processor	400 MHz	1 GHz
Memory	256 MB of RAM	256 MB of RAM
Hard disk	600 MB	700 MB

Symantec Endpoint Protection Manager

Central administration server

Component	32-bit	64-bit
Microsoft Windows 2003	X	X
Microsoft Windows XP	X	
Microsoft Windows 2000 (SP3 and later)	X	
Processor	600 MHz	1 GHz
Memory	512 MB of RAM	512 MB of RAM
Hard disk	500 MB	500 MB

Symantec Endpoint Protection Console

Remote administration console (optional)

Component	32-bit	64-bit
Microsoft Windows Vista	X	X
Microsoft Windows 2003	X	X
Microsoft Windows XP	X	X
Microsoft Windows 2000 (SP3 and later)	X	
Processor	600 MHz	1 GHz
Memory	256 MB of RAM	256 MB of RAM
Hard disk	40 MB	40 MB

Mail protection

Symantec Mail Security for Microsoft Exchange

Server installation system requirements

- Operating systems supported: Windows 2000 Server/Advanced Server/Data Center (SP4), Windows Server® 2003 Standard/Enterprise/Data Center (SP1), Microsoft Windows Server 2003 or Windows Server 2003 R2, Standard or Enterprise Edition

Console-only installation system requirements

- Operating systems supported: Windows 2000 (SP4), Windows 2003 (SP1), Windows XP (SP1)

Exchange Server 2007

- x64 architecture-based computer with Intel® processor that supports Intel Extended Memory 64 technology (Intel EM64T), or AMD processor that supports the AMD64 platform
- 2 GB of RAM minimum
