

SOFTWARE AS A SERVICE

'Try Before You Buy'

As a valued client of Insight, we would like to take this opportunity to offer you the ability to test the future of software!

Insight Software Live, delivering 'Software as a Service', is a cost-effective method of delivering software to all of your end users. Whether you require a simple Microsoft-based platform or a bespoke application on a hosted environment, Insight Software Live is the service to use.

For years organisations have been purchasing "Shrink Wrapped" software products that take time to install and even more time to manage the patches and subsequent development of. As we all know, this includes annual upgrades which inevitably require the replacement of hardware to accommodate them. The costs incurred in the replacement or upgrading of the hardware infrastructure, and the associated costs in managing this, more than outweigh the costs associated with an Insight Software Live solution.

Insight Software Live gives you:

- » A Software Service that is easy to use
- » High speed access to all your applications
- » True management and control of the Software you need
- » Fixed and managed cost control
- » The removal of compliancy issue
- » Real Total Cost of Ownership savings

As part of the Insight Software Live offering we are providing you with the opportunity to "Try Before You Buy" in the form of trial accounts where you can see, test and use the service for a 30 day period. It is simple and easy to set up your trial account - all you need to do is provide the following details to your Account Manager or directly to Renee.Bridges@uk.insight.com

Company Name:

Company Address:

Name of user to be set up for trial account:

Current E-mail address of user to be set up for trail account:

Once we have these details we will set up the user and provide you with the website address, login and password.
