

NETWORKING SERVICES

NETWORK IMPLEMENTATION & DEPLOYMENT INSTALLATIONS ALIGNED TO YOUR BUSINESS REQUIREMENTS

In order to offer a higher level of competitiveness, a network implementation must offer optimum efficiency at a reasonable cost to ensure maximised return on investment. Insight plans each network installation in detail using the latest technology and basing the solution on an organisation's needs and cost considerations.

Insight has a team of engineers that have an in-depth understanding of network infrastructures and are fully accredited to carry out the work required. Each new installation is prepared thoroughly by a team who have gained years of experience in installation services from a variety of projects ranging from simple half day installations right through to full time on site services.

▼ Service Summary

Insight's Network Implementation & Deployment Service includes the survey, design and installation of Ethernet, Fibre and Wireless technologies. This service allows our clients to migrate from old network to new with minimum downtime and maximum support and includes: -

- In depth analysis of network requirements
- Preparation of detailed installation design
- Installation of equipment
- Detailed design and implementation
- Full testing of all equipment
- Handover documents
- Client training and ongoing support

Insight ensures that a bespoke solution to meet your organisation's specific networking requirements is consistently provided.

▼ Accredited Engineers

Insight has a large and growing team of engineers based across the UK & Ireland who work to ISO2000 and ITIL standards, with extensive experience having worked on a wide and diverse range of solutions.

These engineers are able to carry out Implementation & Deployment services for Local / Wide Area Networks (LAN / WAN), Wireless, Security, VoIP and cabling requirements. Insights engineers are fully-trained and accredited across all the major IT vendors.

Insight's engineering teams ensure your new network is up and running as quickly as possible. We avoid unnecessary downtime with flexible network services that we schedule to align with your periods of low network usage.

Insight's networking expertise assists our clients in reducing the complexity, inefficiency and inflexibility of existing LAN / WAN environments to create more cost-effective and scalable network infrastructures.
