

SERVER SOLUTIONS

SERVER IMPLEMENTATION & DEPLOYMENT

DELIVERING OPTIMISED IT PERFORMANCE FOR YOUR ORGANISATION

Implementing and maintaining a server infrastructure that soundly supports your IT environment, while maximising business performance is a key concern for all organisations. Insight's Implementation & Deployment service delivers bespoke server solutions to help meet these objectives, while minimising downtime leaving you free to concentrate on your core business goals.

Customised implementations are carried out according to ratified industry standards and de-facto Best Practice. Where required, Insight provides a fully accredited team of engineers, working under recognised Project Management practices to deliver the solution. The resultant technology solution is then optimally aligned to meet your business demands.

▼ Server Configuration

Insight offers a full range of server configuration services to our clients, from equipment being supplied pre-configured with your desired specifications direct from Insight's custom-designed Configuration Centre, to full integration of server solutions into your existing IT infrastructure.

Insight's Configuration Centre operates under stringent ISO 9001:2000 quality controls and our server configuration services include:

- Hardware installation using relevant management deployment tools
- Hardware soak testing
- Operating system install and initial configuration

Our deployment services are carried out by certified engineers, offering further more bespoke configuration on-site. These include, but are not limited to:

- Network settings
- User and group accounts
- Security and authentication
- Server applications install
- Data migration
- Integration into existing business systems
- Data backup

These services ensure that our clients benefit from a seamless server solution, from initial consultation through to delivery of fully configured server platforms.

For more information on Insight's Server Implementation & Deployment services, please contact us on 0800 333 333 or e-mail solutions@uk.insight.com.

▼ Service Provision

Through Insight's range of Server solution services, clients benefit from a single source supplier for all requirements – Insight can provide advice and design expertise, procurement, implementation and full support for your server environment. Insight's specialists will work closely with you to:

- Link server technology, manageability, processes, and roles to your business objectives
- Integrate server technologies, processes, and people to help ensure a cohesive technical infrastructure
- Plan and advise on the steps necessary to implement your server solution
- Configure server platforms to meet your bespoke business requirements
- Provide a single point of contact and accountability for service delivery

▼ The Benefits

- Minimised risk through implementing the server solution that best suits your needs
- Protection for your current investments in people, skills, and software
- Integrated new technologies into your existing environment
- Controlled, planned delivery of envisaged solutions - to manageable timelines and predictable costs
- Best-practice implementation according to industry standards
- Cost and performance optimised solutions
