

SERVER SOLUTIONS

SERVER SPECIFICATION & DESIGN

SERVERS TAILORED TO MEET YOUR BUSINESS REQUIREMENTS

The rapid growth of IT requirements over the past decade has left many organisations with a server infrastructure which is complex, inflexible, unreliable and costly to manage and support. The result is that organisations are unable to reach their full performance potential, holding them back in an increasingly competitive market environment.

Insight has a dedicated team of server specialists to help you specify and design solutions for your server environment needs. From single workgroup servers to large consolidated blade environments, Insight has proven experience in delivering a high level of service to our clients.

▼ Insight Solution

Insight's Server Specification & Design services will help to simplify your infrastructure environment, and help meet key high level business objectives, such as reduced costs and increased operational efficiency, thus ensuring that the optimum return on investment is achieved.

Insight works closely with clients and the major infrastructure vendors to address specific challenges and business requirements in relation to server technologies. Insight designs according to manufacturer best practices in scoping, sizing and specifying hardware solutions.

By modernising and consolidating server environments, Insight helps you to implement IT environments which are easy to manage and provides a flexible platform which can adapt to business requirements today and in the future.

▼ Service Overview

Insight's team of pre-sales consultants are readily available to discuss your technology requirements and advise on the best commercial solution to meet your needs. Insight's services cover a broad range of server infrastructure solutions, including but not limited to:

- Infrastructure servers (Domain Controllers, File & Print etc)
- Storage servers
- E-mail
- Database
- Business applications, such as Enterprise Resource Planning (ERP) & Customer Relationship Management (CRM)
- Server / Thin client
- Virtualised environments

Insight has a wide range of accreditations with the leading server manufacturers, and our vendor-agnostic approach ensures that we will carry out server specification and design based on your bespoke business requirements.

▼ Benefits

- Strong vendor relationships and industry expertise, delivering bespoke service
- Up-to-date information on the latest products and solutions
- Proven delivery of a wide range of solutions
- Vendor independent – ensuring the right solution is delivered to suit your needs
- Pre-sales advise and recommendations from experienced consultants
- Option of either manufacturer or comprehensive 3rd party support
